To All ECI Students:

This summer ECI will be offering an on-line program for students needing to make up units to graduate on time, get ahead, or reduce the number of courses they need to take their last year. This summer, like every summer, ECI will also offer our 10-week Summer Intensive English and Academic Preparation Program from mid-June to mid-August.

Many international and domestic students need one or two additional classes to be able to graduate with their class. ECI is providing an on-line program where students take classes from an accredited program and official transcripts are mailed directly to their high school. ECI provides a certificated teacher to help students successfully complete their on-line program

ECI also offers two summer programs to prepare and qualify students to study in the Unites States:

1. Academic Preparation Program (**27 hours of class instruction per week**) prepares students to take academic classes during the school year. In addition to improving their English proficiency and TOEFL scores students with permission from their high school, can take academic classes for credit.
2. Summer Intensive Language Program (**17.5 hours of class instruction per week**) is designed to help international students improve their English and TOEFL scores.

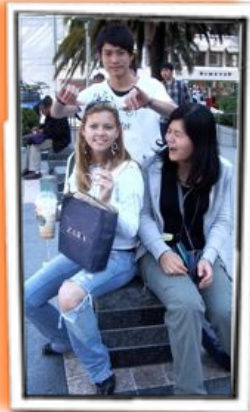

All this in our summer facility with many other international students, near the beach with dormitory housing, outings and activities, and full meal plans.
